

```
1  #include<stdio.h>
2
3  int main(){
4      int array[5][5]={
5          {6,4,7,8,9},
6          {3,7,1,9,9},
7          {8,6,4,2,7},
8          {2,4,2,5,9},
9          {4,1,6,7,3}
10     };
11
12     int row,col,sum;
13
14     for(col=0;col<5;col++){
15         sum=0;
16         for(row=0;row<5;row++){
17             sum+=array[row][col];
18         }
19
20         printf("Sum of column %d: %d\n",col+1,sum);
21     }
22
23     return 0;
24 }
```
